paca

A window into **your herd.**

A native macOS client for Herdr.

Brand identity / Version 1.0

One name. Three useful forms.

Use Paca in prose. Use the supplied lowercase paca artwork in the logo.

Color lockup

Mascot plus wordmark for websites, welcome screens and brand material. Minimum width: 160 px.

One-color lockup

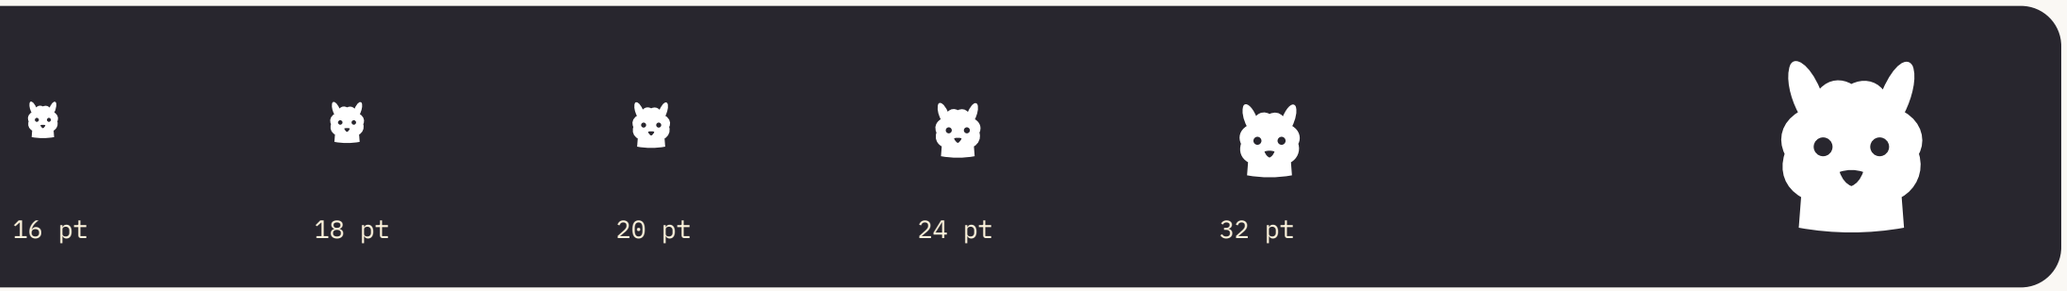

Vector symbol plus outlined wordmark for compact and one-color applications. Minimum width: 104 px.

Clear space: one-quarter of the symbol height around a lockup. For the wordmark alone, leave half its lowercase x-height.

Made for the menu bar.

The simplified symbol keeps the ears, wool outline and face. The eye and nose counters are transparent.

Use 18 pt in the macOS menu bar and 20-24 px in toolbars. Set NSImage.isTemplate to true so macOS controls tint. Keep status counts beside the mark.

Files: toolbar/PacaTemplate.imageset/ and toolbar/paca-template.svg

An alpaca at the window.

The neck crosses the tile edge. The eyes, muzzle and ears remain visible.

Primary / lavender

Alternate / curious mint

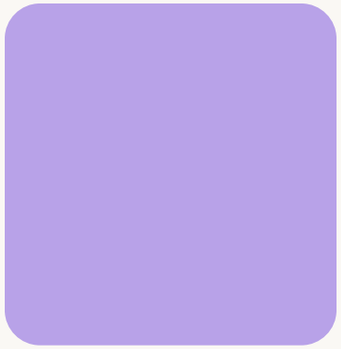

Alternate / calm charcoal

Use the supplied .icns or AppIcon asset catalog for macOS. Use the full-square PNG for web avatars. The macOS tile has a transparent outer margin; the mascot meets the inner tile boundary.

Soft fields. Clear contrast.

Use ink on the pastel colors. Use cream on dark backgrounds.

Lavender

#B8A2E8

Mint

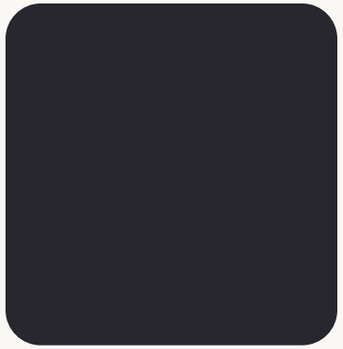

#CDE4D6

Cream

#FFF5DE

Oat

#EAD2B2

Ink

#28262E

Paper

#FAF8F4

Cream on ink

13.77:1

Ink on lavender

6.66:1

Violet #69508F on paper: 6.30:1. Use violet for links and actions on light backgrounds.

Manrope, with a native UI.

A rounded sans for the brand. System fonts for the macOS app.

A window into your herd.

Paca brings your Herdr workspaces, agents and terminals into a native macOS app.

WORKING / 3 AGENTS

Fonts and OFL license files are included. Native controls keep SF Pro; terminal text keeps its configured monospace font.

Brand scale

Display

56-72 px / 600

Heading

32-40 px / 600

Body

16-18 px / 400

Technical label

12-14 px / Mono

Keep the peeking crop deliberate.

Align the cut neck with a window edge. Use the complete mascot when it stands alone.

Complete portrait

No crop. Keep clear space around the silhouette.

Window composition

Neck meets bottom and right edges. Ears stay visible.

Say what the agent needs.

Use plain language. Keep the mascot playful and the interface precise.

ATTENTION

2 agents need input.

EMPTY STATE

No agents in this workspace.

DISCONNECTED

Herdr is offline. Start Herdr to reconnect.

APPROVAL

This agent needs approval. Open its terminal to respond.

Status is separate from brand color.

- Working
- Needs input
- Done
- Error

Pair color with a label and a distinct shape. The optional token files include separate light and dark values.

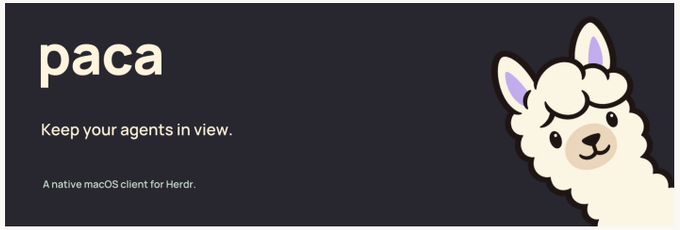

Copy examples are guidance. Check shipped capabilities before using them in product marketing.

Ready for a first introduction.

Use the prepared layouts for previews, project pages and social accounts.

Open Graph / 1200 x 630

Banner / 1500 x 500

Square / 1080 x 1080

Everything lives in brand/.

Keep the source artwork. Choose the smallest asset that fits the job.

`logos/`	Wordmarks, color lockups and one-color lockups
`marks/ + toolbar/`	Vector glyph, template PDF and raster toolbar sizes
`app-icons/`	Three .icns files, iconsets and an Xcode catalog
`web/ + social/`	Favicons, web manifest, avatars and social templates
`fonts/ + tokens/`	Font files, licenses, CSS, JSON and SwiftUI tokens
`mascot/ + originals/`	Transparent artwork and preserved generated originals
`scripts/ + sources/`	Rebuild scripts, provenance and generation prompts

The symbol and wordmarks are vector. Color mascot layouts embed 1254 px raster artwork. The kit is saved separately; it does not change the application theme or bundle configuration.

`Font sources and licenses: sources/provenance.json and fonts/*/OFL.txt`
